

Wagner Moisture Meters

Industrial Hand-held Moisture Meters

Since 1965, Wagner Meters has been providing accurate, rugged, and easy to use moisture measurement products and systems for the primary and secondary wood products industry. Utilizing patented, electromagnetic wave technology, Wagner's line of industrial hand-held meters is designed to provide the features and rugged design required for lumber producers and wood products plants.

L622 Digital Recording Hand-Held Moisture Meter

- Stores up to 5,000 separate MC readings in up to 200 different groups for comparisons
- Stat-Pak® Data Analysis Software included
- Interfaces with Optional Stack Probe Accessory
- Scans area 2.5" x 2.5"
- Best suited for wood thicknesses from .75" to 3.0"
- Customize 32 built-in species
- Backlit two-line 32 character LCD screen
- Includes calibration verification block

L722 Stack Probe Accessory for L622

- Reaches deep into stickered packs of lumber
- Takes multiple readings in just minutes
- Scans area 2.5" x 2.5"
- Best suited for wood thicknesses from .75" to 3.0"

Length options:

- 40"
- 26"

L620 Digital Tracking Hand-Held Moisture Meter

- Stores up to 500 separate MC readings in up to 5 different groups for comparisons
- Quickly scans whole boards
- Scans area 2.5" x 2.5"
- Best suited for wood thicknesses from .75" to 3.0"
- Backlit two-line 32 character LCD screen
- Customize 32 built-in species
- Includes calibration verification block

L601-3 Quick Scanning Hand-Held Moisture Meter

- Designed for rugged, fast scanning use
- Scans area 2.5" x 2.5"
- Easy to read analog display
- Best suited for wood thicknesses from .75" to 3.0"
- Available factory calibrated for Douglas Fir or Southern Yellow Pine
- Manual includes species adjustment tables

Check out these great products

Smart Logger™

- Collects and stores relative humidity and temperature readings

Omega Moisture Measurement System

- Scans every board automatically for moisture content

Wagner Meters

Over 30 years ago, Wagner made pinless hand-held moisture measurement technology reliable and effective, and this continues today with our current generation of fast-scanning hand-held moisture meters.

At the kilns, in the planer mill, or any other part of your production process where you need to measure wood moisture, nothing is faster or easier to use than Wagner's long-proven technology. Scanning deep into the wood, not just the surface, Wagner's rugged hand-held moisture meters truly give you the accurate measurements you need for your moisture quality control program.

Hardwood and softwood mills, as well as many secondary wood products manufacturers throughout the world, are long-time Wagner customers. If you haven't made the switch to our truly accurate technology for fast-scanning of your lumber, now is the time. We look forward to hearing from you.

Respectfully,

A handwritten signature in cursive script that reads "Ron Smith".
